

Intentional Innovation® for Continuous Growth.

OVERVIEW

At Teaming Worldwide, we use Intentional Innovation® to put high growth initiatives to work in your organization. We create these initiatives for you, with you, or teach you how by leveraging a powerful and unique process that we have developed over thirty years. The process represents insights from working with over 200 brands in 25 industries and has resulted in hundreds of innovations launched in the market by companies ranging in size from startup to Fortune 50.

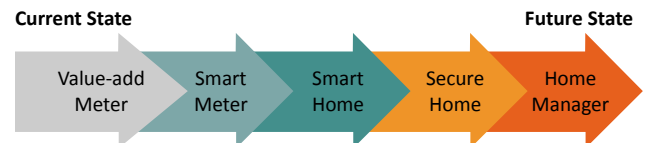

Our process has been developed to facilitate each organization uniquely. Our practices reduce risk, ignite creativity, and triple implementation rates while accelerating overall growth. The process does this by being practical, simple, and repeatable while creating solutions that generate long-term sustainable growth. The practicality of it makes it easy to embrace and its history of success proves its ability to address the innovation goals of a wide range of organizations, from for-profit to non-profit to government.
